### **DETAILED ACTION**

1. This is in response to the Applicant's amendments and arguments filed on January 30, 2006 in which claims 3 and 11 have been amended, and claims 14-16 have been added, and claims 1, 2, and 6 have been canceled. Claims 3-5 and 11-16 are currently pending.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven R. Santema Reg. No. 40,156.

3. The application has been amended as follows:  
Please cancel claims 7-10.

### ***Allowable Subject Matter***

4. After a further search and thorough examination of the present application and in view of the applicant's arguments and amendments, claims 3-5, 11-16, renumbered as 1-9, are found to be in condition of allowance.

5. The following is an examiner's statement of reasons for allowance: the cited prior arts teach when a reconnection paging is requested is in different system, the former MSC should issue a paging request to the later MSC. Upon receipt to the paging request, the later MSC transmits the received response to the former MSC to complete

Art Unit: 2617

the call. The prior arts further teach a mobile unit that encounters a service interruption while roaming from a first MSC to a second MSC, and initiates a reconnection by sending a message to the second MSC, which includes mobile ID and last location identifier. Thereafter, the second MSC sends a Prepare Handover to the first MSC to facilitate reconnection.

On the other hand with respect to claims 3-5, the Applicant teaches that the first MSC queries a database for the suspended call session responsive to receiving a suspended call handoff request from the second MSC and sending to the second MSC a suspended call handoff acknowledgement including information associated with the suspended call session. These limitations, in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior art of record.

As per claims 11-16, the Applicant further teaches maintaining a database of session information, querying the database for session information corresponding to the session identifier or to the mobile unit identifier responsive to receiving a MORC message, and if session information is not found, sending a suspended call handoff request to the first MSC associated with a plurality. These limitations, in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
